## Corporate Profile

Abaja Contracting Establishment (ACE) is a leading Civil, Electrical & Mechanical Construction and Maintenance Company based in the Kingdom of Saudi Arabia. ACE was founded in the year 2007 in Dammam, the Eastern province of KSA with its vision to be Saudi Arabia's first supplier of choice for national builders and local contractors.

The diverse range of business sectors we engage, include all types of Commercial, Residential, Industrial and Turnkey Construction Projects from Conception to Completion. We have capabilities to offer complete custom designed solutions including Interior & Exterior Designing, Renovations, Exterior Remodeling and Structural Engineering. We also provide all types of External and Internal finishes and Maintenance.

ACE is dedicated to business with trustworthy dealings in all its transactions and professional approaches to provide Quality Construction and Building Contracting Solutions while maintaining high standards of QHSE and Value Engineering for the benefit of our customers, nation and society. We have created a pleasant working environment, where our highly experienced and dedicated employees can enjoy their work in a free and creative organizational culture, and provide inspirational, distinguished high-class service.

In line with the Kingdom's "Vision 2030" ACE has invested its resources to meet international standards and upgraded its fleet of equipment in preparation to participate in upcoming diverse projects. We continually strive for excellence in the ever-increasing challenges of the changing construction industry and endorsing to enhance Domestic value creation & Saudization.

The company's position has evolved over the past few years with an increasing number of projects and an upward growing turnover. Profits are essential, but our Vision and Mission reflect the socially and environmentally responsible company we aspire to be.

## OUR VISION

Aspires to be the Leading Service provider for Construction industry to build the Kingdom affiliated with the Vision 2030.

# Policy Statements

## A: Health and Safety Policy

It is Abaja Contracting Est.'s company policy to give prime importance to the health and safety of its employees. This is considered to be a management responsibility equal to that of any other function.

## B: Quality Management Policy

The objective of Abaja Contracting Est. management is to provide a first class quality service to all our customers at all times. It is company policy to establish and maintain an effective quality management system. Our goal is to be the first choice of our customers and employees by getting it right, on time, every time.

## C: Training and Development Policy Statement.

Abaja Contracting Est. believes in continuously creating and developing our unique strengths, as a business and as individuals. The management, at all levels, recognise the important contribution which training makes to the company's continuing profitability.

# Policy Statements

## The Company intends to:

Implement a training plan which is relevant to the needs of both the Company and employees

Enable all employees to gain sufficient knowledge to do their job in an effective way and to do it right the first time

Identify Company and individual training needs using feedback from Employee Appraisals, Employee Surveys, the "Continuous Improvement Programme" and Company strategies and plans

Prioritise training on the basis of individual and Company needs and available funding from the training budget

Train by in-house and external courses and on-the-job training involving apprenticeship schemes, training organisations, company employees and management

Ensure appropriate cross-training at Supervisor and Operator level to enable effort to be directed into the area where it is needed most

Provide induction training to newcomers to ensure an appreciation of the organisation and early integration with the company, its management and other employees

Participate in Saudi Arabian Government training initiatives such as work experience, training programmes and craft apprenticeships, providing training to meet the needs of the company and its social responsibilities in the community

Encourage development of computing skills and the use of new technology at all levels, through appropriate courses and training

Monitor and evaluate the effectiveness of training using self-assessment, performance appraisal and assessments of future potential within the company's management structure

Maintaining training records for each employee identifying training needs, qualification attained, courses and programmes attended, and performance

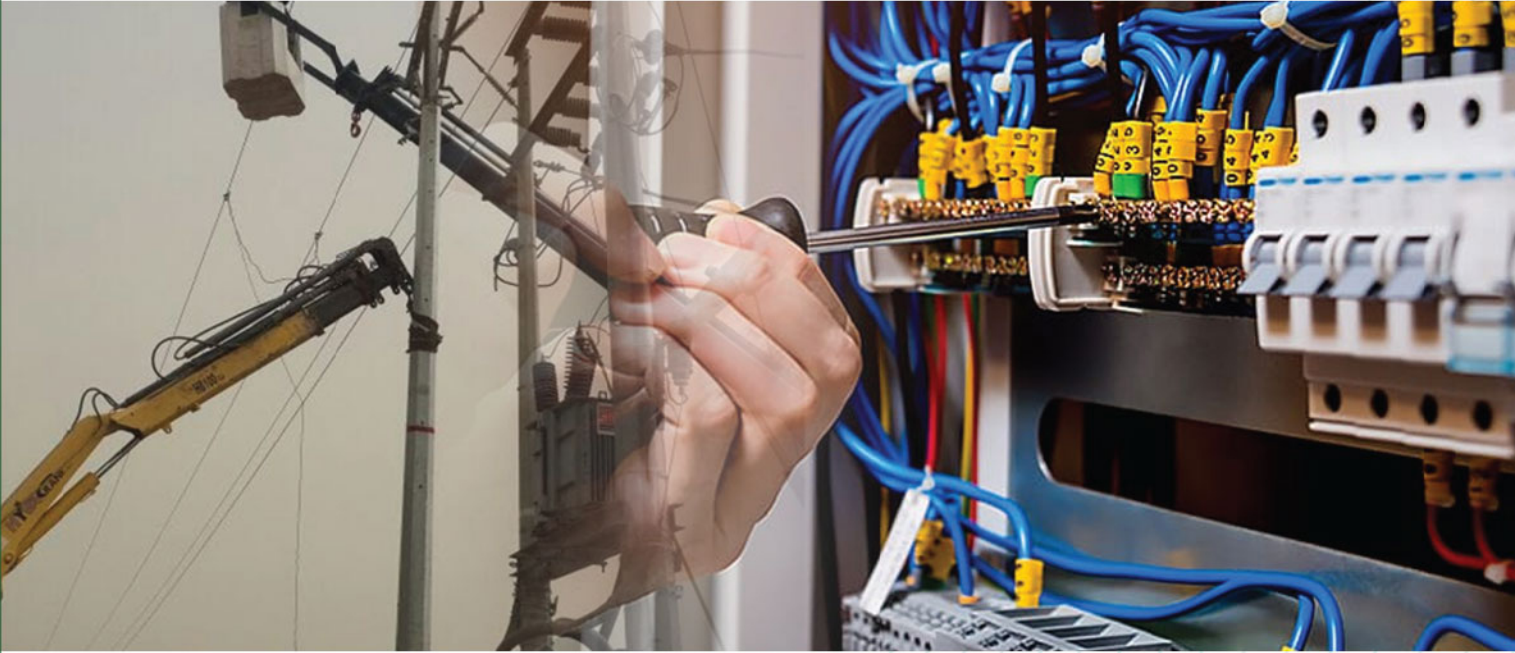

Recognise skills attained by employees and account for these in assessments and reviews for further development.

# Corporate Capability

Abaja Contracting Establishment (ACE) is a wholly Saudi Establishment with a wide experience in construction, electrical, instrumentation ,mechanical work ,rental of equipment's and supply of man power. We have been engaged in operation and maintenance services with major organisations such as Saudi ARAMCO and SCECO since 1982. ACE also involved in manpower supply and all equipment on long and short term basis within the oil, petrochemical and the private industry sectors of Saudi Arabia. The scopes of the general services provided are outlined hereunder:

# Corporate Capability

## Electrical Installations

Overhead and underground distribution systems up to 36 kV, including laying, termination and connection of cable and installation of poles, transformers, distribution cabinets, meters and substation installations.

Supply Installation of Cathodic protection systems for Oil & Gas wellheads, Pipelines & Storage tanks , including Deep anode installation.

Supply and installation of transmission tower lines & commissioning.

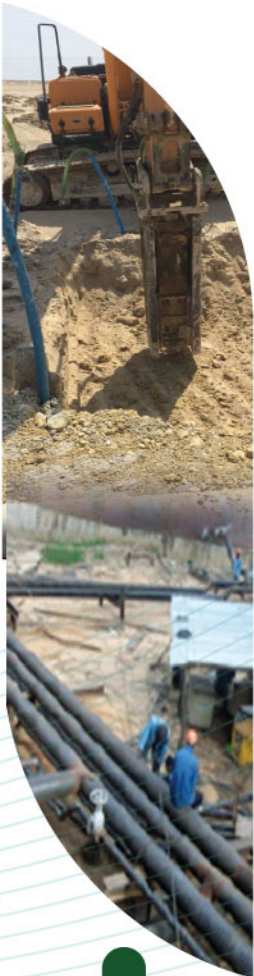

Maintenance of substations, Transformer testing , reset relays etc.

Design, Survey , Supply & Installation of distribution networks ( LSTK ) Testing and commissioning of all of the above systems.

# Corporate Capability

## Mechanical Construction

Wellhead modification work, Hydro testing, spool replacement. Installation of sewerage pipe lines.

General maintenance of heavy and light equipment.

Construction of mechanical work, shop buildings.

Fabrication of substation doors, cabinets and mechanical components etc.

Sandblasting and painting of industrial pipelines and equipment etc.

On site fabrication and erection of process piping.  
Pipelines installation with Hydro testing & 100% radiography.

We have plan to do hydro jetting business.

# Corporate Capability

## Civil Construction

Including but not limited to industrial earthwork projects, site grading and site roads in industrial areas.

Construction of all types of buildings, traditional and/or concrete construction.

Renovation of all types of buildings.

Demolition of concrete and steel structures.

We have received many appreciation letters from Saudi Aramco.

# Corporate Capability

## Cathodic Protection

Cathodic Protection for the deep anode installation at the Gas & Oil wells for the well head protection, which involves

Drilling up to 200 meters.

Installation of casing pipe

Anodes installation

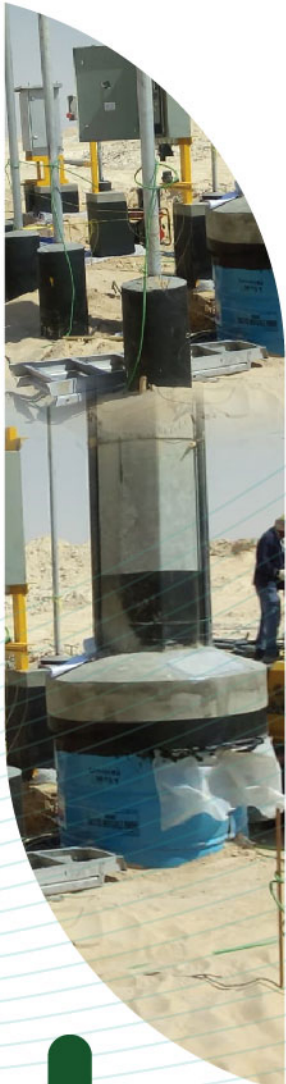

Drill stem resistance & well head resistance balancing

Rectifier installation

C.P. station

Fencing positive & negative cable installation

Commissioning of CP systems.

# Corporate Capability

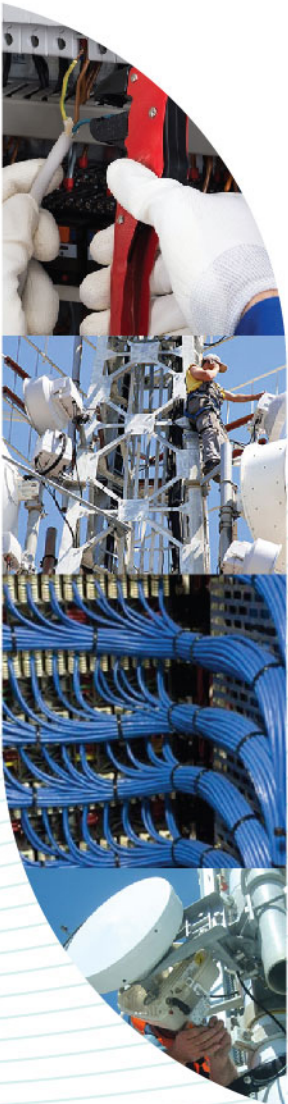

## Telecommunications

ACE has successfully completed many projects comprising of construction and maintenance of a telephone distribution system in Dammam, Khobar, and Qatif.

Under separate contracts we completed work to expand the Dammam telephone distribution system and for the construction and expansion of the P.T.T. systems in Jizzan, and Sharrora.

We are STC approved contractor with vendor code 20169.

# Corporate Capability

## We buy and sell any type of scrap

ABAJA Contracting EST is also involved in procuring and selling of scrap and recycled ferrous & non-ferrous metals. We are a trusted partner to a range of companies across the recycling industry from processors, refineries, smelters, to manufacturers.

Aluminum Scrap

Brass Scrap

Computer Parts Scrap

Copper Scrap

Electrical Scrap

Ferrous & Non ferrous Scrap

GI Scrap

Iron Pipe Scrap

Iron Scrap

Nickel Scrap

PVC Pipe Scrap

Empty drum Scrap

# Corporate Capability

## Equipment and Rental Services

All types of construction and Security equipment are available for short term and long term rental purposes and are being hired by different companies in the Kingdom.

## Vehicles Rental Services

All types of vehicle are available for short term and long term rental purposes and are being hired by different companies in the Kingdom like Aramco and Scco.

# Corporate Capability

## Electrical Installation

- Overhead and underground distribution systems up to 36 kV, including laying, termination and connection of cable and installation of poles, transformers, distribution cabinets, meters and substation installations.
- Supply Installation of Cathodic protection systems for Oil & Gas wellheads, Pipelines & Storage tanks , including Deep anode installation.
- Supply and installation of transmission tower lines & commissioning.
- Maintenance of substations, Transformer testing , reset relays etc.
- Design, Survey , Supply & Installation of distribution networks ( LSTK ) Testing and commissioning of all of the above systems.

# Corporate Capability

## Mechanical Installation

- Wellhead modification work, Hydro testing, spool replacement. Installation of sewerage pipelines.
- General maintenance of heavy and light equipment.
- Construction of mechanical work, shop buildings.

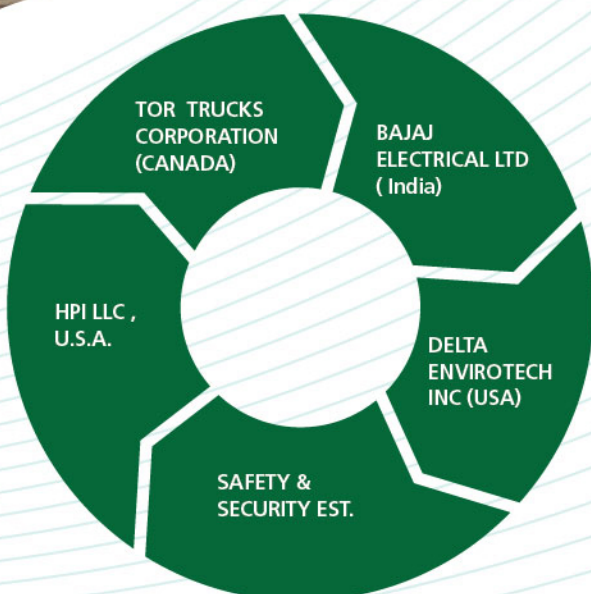

### TURN KEY FOR RESIDUAL FUEL PLANT

- Complete Residual Fuel Oil Plant in Bahrain which included all Civil, Mechanical, Electrical, Instrumentation works.
- RFO process area has the storage capacity of RFO is 20000 MT (2 tank of 10000 MT) and storage capacity of Lube oil is 10000 MT. The storage capacity of Diesel / LVGO is 10000 MT (2500 X 4 tanks).

# pitch oil recovery project –bahrain

M/s Abaja Contracting Establishment sharing with M/s. Agas International Company of Bahrain and M/s. Al-Awaji Alsaudia Holding Company are the owner of residue pond. The pitch oil is recovered from residue by applying suitable technical process developed by process contractor, Terra- Mumbai and it is mixed with LVGO/Diesel oil /lube oil in the proper ratio to produce a value added product known as Residual Fuel Oil (RFO) in a plant called as "Process Area". The production capacity of RFO plant is 2500 MT per day aggregating to 75000 MT per month.

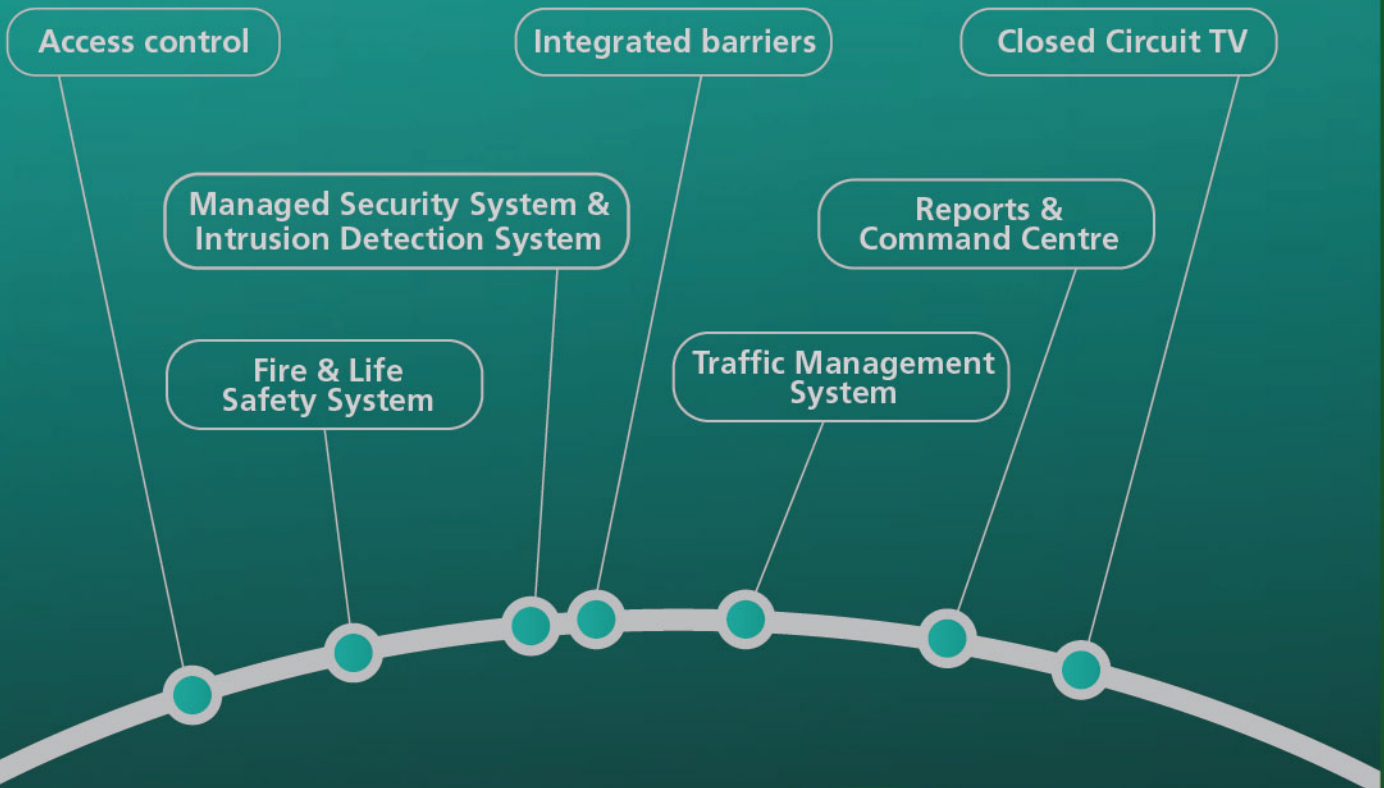

The RFO thus produced is exported via marine import/export terminal at " Jetty Area" The distance between " Process Area" and "Jetty Area" is 20 km and mode of transport is road trucks. For this purpose 2 ships of RFO each of 35000 MT consignments are dispatched in each month. In 1st phase LVGO & Diesel will be mixed with pitch oil to produce RFO. After successful completion of 1st phase the necessary used lube oil will be imported via import/export terminal in the 2nd phase at later date for manufacture of RFO. The facilities are designed to export RFO at the rate of 75000 MT per month and import lube oil at the rate of 30000 MT per month.
