

## Saudi Industrial Chemical Factory - SICF

### Company Overview

Saudi Industrial Chemical Factory (SICF) is a leading plasticizer manufacturing company located in the **3rd Industrial City, Jeddah, Kingdom of Saudi Arabia**. The company is widely recognized as the **first producer of Dioctyl Terephthalate (DOTP) in the GCC region**, playing a strategic role in supporting the plastics, cables, automotive, and construction industries.

SICF was established with a clear objective to supply high-quality plasticizers and industrial chemicals that meet international standards while supporting local manufacturing and regional supply chains. SICF's operations align with **Saudi Vision 2030**, contributing to localization, import substitution, and industrial diversification.

- **Vision**  
To be a preferred regional manufacturer of plasticizers and specialty chemicals by delivering reliable, sustainable, and high-performance solutions.
- **Mission**
  - To manufacture products that meet global quality standards
  - To ensure consistent supply and customer satisfaction
  - To operate safely and responsibly with respect to health, safety, and the environment
  - To build long-term partnerships through technical support and reliability

### Product Portfolio

SICF specializes in the production of plasticizers primarily used in flexible PVC and polymer-based applications.

#### Dioctyl Terephthalate (DOTP)

DOTP is a non-phthalate plasticizer used as an environmentally friendly alternative to traditional phthalates.

- **Applications:** - Wires and cables
  - Automotive interiors
  - Flooring and wall coverings
  - Flexible PVC products

#### Dioctyl Adipate (DOA)

DOA is an ester-based plasticizer known for its excellent low-temperature flexibility and processing behavior.

- **Applications:** - Flexible PVC products  
- Food packaging films and freezer wraps  
- Wire and cable insulation

### **Diethyl Phthalate (DOP)**

DOP is a widely used general-purpose plasticizer known for its excellent compatibility with PVC and cost-effective performance.

#### **Applications:**

- Flexible PVC products
- Cables and wires
- Hoses, profiles, and synthetic leather

### **Diethyl Sebacate (DOS)**

DOS is a specialty plasticizer designed for demanding applications requiring performance at extremely low temperatures.

- **Applications:** - Cold-resistant PVC cables  
- Synthetic rubber products  
- Automotive and industrial lubricants

### **Manufacturing and Quality Assurance**

SICF operates a manufacturing facility equipped with advanced production systems and in-house quality control laboratories. Products are supplied with Certificates of Analysis (COA) and Material Safety Data Sheets (MSDS).

### **Health, Safety, and Environment (HSE)**

Health, safety, and environmental protection are core values at SICF. The company follows recognized industry standards to ensure safe operations, environmental compliance, and continuous improvement in sustainability.

### **Commitment to Growth**

SICF is committed to continuous improvement, capacity expansion, and product development in line with market demand.

### **Saudi Industrial Chemical Factory (SICF)**

Reliable solutions in plasticizers and industrial chemicals.
